

Black Devil

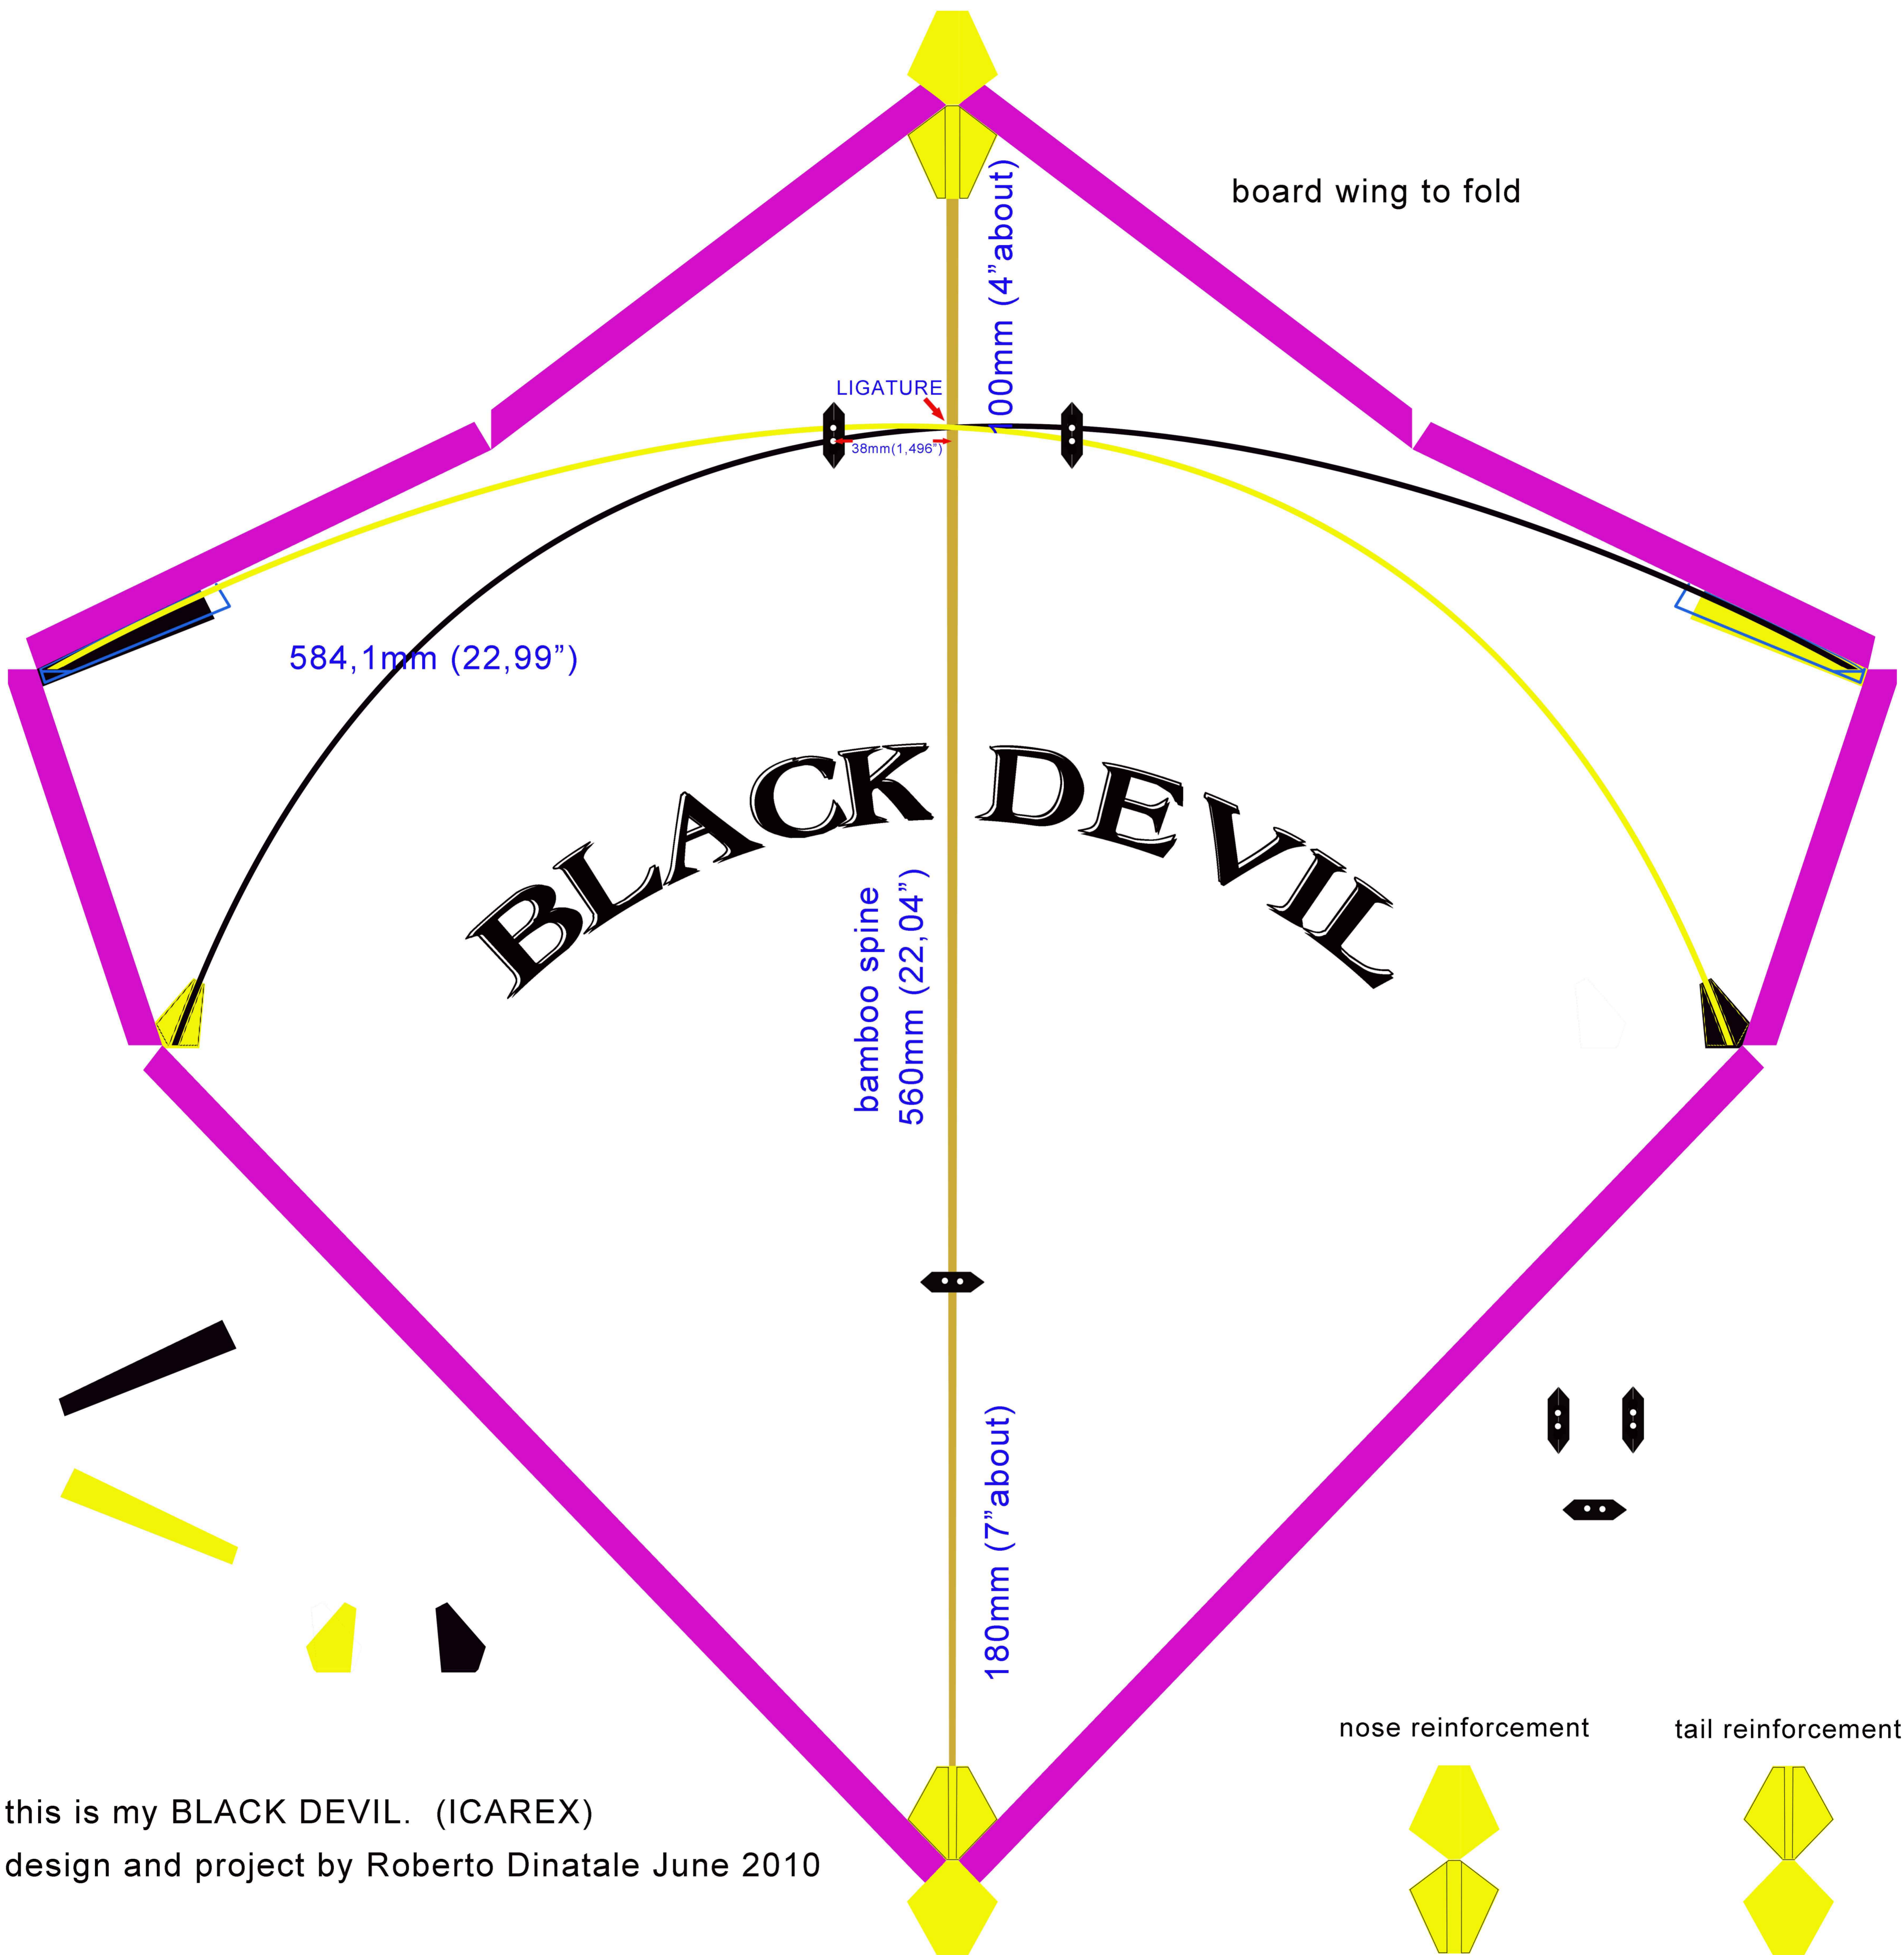

a fighter kite design by Roberto Dinatale

A several days ago I received an email that included a very interesting and unusual fighter kite design, from a fighter kite forum member, codirosso96 . Included is the plan, some photos and a link to a youtube video of the kite in flight in light winds and a link to a website where you can see more. Here's the youtube link <http://www.youtube.com/watch?v=hdNKOe2Edgk> and here is the link to the fighter kite bar, scroll down to see this kite info. <http://translate.google.com/translate?client=tmpg&hl=en&u=http%3A%2F%2Ffightersbar.blogspot.com%2F&langpair=it|en>

The following page includes the detailed plan for this great fighter kite. I hope you enjoy making and flying it. BigGrins, Bruce.

this is my BLACK DEVIL. (ICAREX)
 design and project by Roberto Dinatale June 2010

sorry but I have not measured the bows. Size passing through the center of two (100 mm 4"about). they are 1.5 mm (0.0590551")
